Maximizing Density Through Affordability

A Developer’s Guide to the California Density Bonus Law

By Jon E. Goetz and Tom Sakai

Savvy housing developers are taking advantage of California’s Density Bonus Law, a mechanism which allows them to obtain more favorable local development requirements in exchange for offering to build affordable or senior units. The Density Bonus Law (found in California Government Code Sections 65915 – 65918) provides developers with powerful tools to encourage the development of affordable and senior housing, including up to a 35% increase in project densities, depending on the amount of affordable housing provided. The Density Bonus Law is about more than the density bonus itself, however. It is actually a larger package of incentives intended to help make the development of affordable and senior housing economically feasible. Other tools include reduced parking requirements, other incentives and concessions such as reduced setback and minimum square footage requirements, and the ability to donate land for the development of affordable housing to earn a density bonus. Often these other tools are even more helpful to project economics than the density bonus itself, particularly the special parking benefits. Sometimes these incentives are sufficient to make the project pencil out, but for other projects financial assistance is necessary to make the project feasible.

In determining whether a development project would benefit from becoming a density bonus project, developers also need to be aware that:

• The Density Bonus is a state mandate. A developer who meets the requirements of the state law is entitled to receive the density
bonus and other benefits. As with any state mandate, some local governments will resent the state requirement and will attempt to resist. But many local governments like the density bonus as a helpful tool to cut through their own land use requirements and local political issues.

• Use of a density bonus may be particularly helpful in those jurisdictions that impose inclusionary housing requirements for new developments.

How the Density Bonus Works

Projects Entitled to a Density Bonus

Cities and counties are required to grant a density bonus and other incentives or concessions to housing projects which contain one of the following:

• At least 5% of the housing units are restricted to very low income residents.
• At least 10% of the housing units are restricted to lower income residents.
• At least 10% of the housing units in a for-sale common interest development are restricted to moderate income residents.
• The project donates at least one acre of land to the city or county for very low income units, and the land has the appropriate general plan designation, zoning, permits and approvals, and access to public facilities needed for such housing.
• The project is a senior citizen housing development (no affordable units required).
• The project is a mobilehome park age-restricted to senior citizens (no affordable units required).

Density Bonus Amount

The amount of the density bonus is set on a sliding scale, based upon the percentage of affordable units at each income level, as shown in the chart on the following page.

Jon E. Goetz

Jon is a shareholder at Kronick Moskovitz Tiedemann & Girard, with more than 25 years of experience in land use, real estate, affordable housing, redevelopment and municipal law. He represents a broad spectrum of private sector landowners and real estate developers, as well as redevelopment agencies, universities and other public entities in complex real estate development transactions, land use planning, affordable housing and redevelopment transactions. * All density bonus calculations resulting in fractions are rounded up to the next whole number.

** Affordable unit percentage is calculated excluding units added by a density bonus.

*** No affordable units are required for senior housing units to receive a density bonus.
**Required Incentives and Concessions**

In addition to the density bonus, the city or county is also required to provide one or more “incentives” or “concessions” to each project which qualifies for a density bonus (except that market rate senior citizen projects with no affordable units, and land donated for very low income housing, do not appear to be entitled to incentives or concessions). A concession or incentive is defined as:

- A reduction in site development standards or a modification of zoning code or architectural design requirements, such as a reduction in setback or minimum square footage requirements; or
- Approval of mixed use zoning; or
- Other regulatory incentives or concessions which actually result in identifiable and financially sufficient cost reductions.

The number of required incentives or concessions is based on the percentage of affordable units in the project:

- For projects with at least 5% very low income, 10% lower income or 10% moderate income units, one incentive or concession is required.
- For projects with at least 10% very low income, 20% lower income or 20% moderate income units, two incentives or concessions are required.
- For projects with at least 15% very low income, 30% lower income or 30% moderate income units, three incentives or concessions are required.

The city or county is required to grant the concession or incentive proposed by the developer unless it finds that the proposed concession or incentive is not required in order to achieve the required affordable housing costs or rents, or would cause a public health or safety problem, cause an environmental problem, harm historical property, or would be contrary to law. Financial incentives, fee waivers and reductions in dedication requirements may be, but are not required to be, provided by the city or county.

**Other Forms of Assistance**

A development qualifying for a density bonus also receives two additional forms of assistance which have important benefits for a housing project:

- **Waiver or Reduction of Development Standards.** If any other city or county development standard would physically prevent the project from being built at the permitted density and with the granted concessions/incentives, the developer may propose to have those standards waived or reduced. The city or county is not permitted to apply any development standard which physically precludes the construction of the project at its permitted density and with the granted concessions/incentives. The city or county is not required to waive or reduce development standards that that would cause

> “This ability to force the locality to modify its normal development standards is sometimes the most compelling reason for the developer to structure a project to qualify for the density bonus.”

a public health or safety problem, cause an environmental problem, harm historical property, or would be contrary to law. The waiver or reduction of a development standard does not count as an incentive or concession. Development standards which have been waived or reduced utilizing this section include setback requirements and lot coverage requirements. This ability to force the locality to modify its normal development standards is sometimes the most compelling reason for the developer to structure a project to qualify for the density bonus.
Maximum Parking Requirements. Upon the developer’s request, the city or county may not require more than one onsite parking space for studio and one bedroom units, two onsite parking spaces for two and three bedroom units, and two and one-half onsite parking spaces for units with four or more bedrooms. Onsite spaces may be provided through tandem or uncovered parking, but not onstreet parking. Requesting these parking standards does not count as an incentive or concession, but the developer may request further parking standard reductions as an incentive or concession. This is one of the most important benefits of the density bonus statute. In many cases, achieving a reduction in parking requirements may be more valuable than the additional permitted units.

In many cases, achieving a reduction in parking requirements may be more valuable than the additional permitted units.

Affordable Housing Restrictions

Rental Units. Affordable rental units must be restricted by an agreement which sets maximum incomes and rents for those units. As of January 1, 2015, the income and rent restrictions must remain in place for a 55 year term (formerly only a 30 year term was required). Rents must be restricted as follows:

- For very low income units, rents may not exceed 30% x 50% of the area median income for a household size suitable for the unit.
- For lower income units, rents may not exceed 30% x 60% of the area median income for a household size suitable for the unit.
- Area median income is determined annually by regulation of the California Department of Housing and Community Development, based upon median income regulations adopted by the U.S. Department of Housing and Urban Development.
- Rents must include a reasonable utility allowance.
- Household size appropriate to the unit means 1 for a studio unit, 2 for a one bedroom unit, 3 for a two bedroom unit, 4 for a three bedroom unit, etc.
For Sale Units. Affordable for sale units must be sold to the initial buyer at an affordable housing cost. Housing related costs include mortgage loan payments, mortgage insurance payments, property taxes and assessments, homeowner association fees, reasonable utilities allowance, insurance premiums, maintenance costs, and space rent.

- For very low income units, housing costs may not exceed 30% x 50% of the area median income for a household size suitable for the unit.
- For lower income units, housing costs may not exceed 30% x 70% of the area median income for a household size suitable for the unit.
- For moderate income units, housing costs may not exceed 35% x 110% of the area median income for a household size suitable for the unit.
- Buyers must enter into an equity sharing agreement with the city or county, unless the equity sharing requirements conflict with the requirements of another public funding source or law. The equity sharing agreement does not restrict the resale price, but requires the original owner to pay the city or county a portion of any appreciation received on resale.
- The city/county percentage of appreciation is the purchase price discount received by the original buyer, plus any down payment assistance provided by the city/county. (For example, if the original sales price is $200,000, and the original fair market value is $250,000, and there is no city/county down payment assistance, the city/county subsidy is $50,000, and the city/county’s share of appreciation is 20%).
- The seller is permitted to retain its original down payment, the value of any improvements made to the home, and the remaining share of the appreciation.
- The income and affordability requirements are not binding on resale purchasers (but if other public funding sources or programs are used, the requirements may apply to resales for a fixed number of years).

How the Density Bonus Works for Senior Projects

As shown in the Density Bonus Chart above, a senior citizen housing development meeting the requirements of Section 51.3 or 51.12 of the Civil Code qualifies for a 20% density bonus. This is a very desirable option for senior housing developments. In jurisdictions where the local ordinances do not reduce the parking requirements for senior housing developments, the reduced parking requirements alone may justify applying for a density bonus.

“In jurisdictions where the local ordinances do not reduce the parking requirements for senior housing developments, the reduced parking requirements alone may justify applying for a density bonus.”

How the Density Bonus Works for Condominium Conversion Projects

The density bonus statute provides for a density bonus of up to 25% for condominium conversion projects providing at least 33% for the total units to low or moderate income households or 15% of the units to lower income households. Many condominium conversion projects are not designed in a manner that allows them to take advantage of the opportunity to construct additional units, but some projects may find this helpful. While condominium conversions are not presently a viable development alternative, this provision may be of some value in limited situations in the future.
How the Density Bonus Works for Child Care

Housing projects that provide child care are eligible for a separate density bonus equal to the size of the child care facility. The child care facility must remain in operation for at least the length of the affordability covenants. A percentage of the child care spaces must also be made available to low and moderate income families. A separate statute permits cities and counties to grant density bonuses to commercial and industrial projects of at least 50,000 square feet, when the developer sets aside at least 2,000 square feet in the building and 3,000 square feet of outside space for a child care facility. See Government Code Section 65917.5 for additional details.

How to Obtain a Density Bonus Through Land Donation

Many market rate housing developers are uncomfortable with building and marketing affordable units themselves, whether due to their lack of experience with the affordable housing process or because of their desire to concentrate on their core market rate homes. Other developers may have sites that are underutilized in terms of project density. The density bonus law contains a special sliding scale bonus for land donation which allows those developers to turn over the actual development of the affordable units to local agencies or experienced low income developers. The density bonus is available for the donation of at least an acre of fully entitled land, with all needed public facilities and infrastructure, and large enough for the construction of a high density very low income project containing 10% of the total homes in the development. The parcel must be located within the boundary of the proposed development or, subject to the approval of the jurisdiction, and within one-fourth mile of the boundary of the proposed development. The more units that can be built on the donated land, the larger the density bonus. Because of the parcel size requirements, this option is only practical for larger developments. The land donation density bonus can be combined with the regular density bonus provided for the development of affordable units, up to a maximum 35% density bonus. A master planned community developer needs to carefully evaluate the land donation option as opposed to engaging an affordable housing developer to fulfill the project’s affordable housing obligations. In many cases the master developer
will prefer to control the affordable component of the project through a direct agreement with the affordable housing developer, rather than allowing the local government to control the project.

How the Density Bonus Can Help in a Friendly Jurisdiction

While the density bonus law is often used by developers to obtain more housing than the local jurisdiction would ordinarily permit, it can also be a helpful land use tool in jurisdictions which favor the proposed project and want to provide support. Planners in many cities and counties may be disposed by personal ideology or local policy to encourage the construction of higher density housing and mixed use developments near transit stops and downtown areas, but are hampered by existing general plan standards and zoning from approving these sorts of projects. Elected officials often support these projects too, but may find it politically difficult to oppose neighborhood and environmental groups over the necessary general plan amendments, zoning changes and CEQA approvals.

“The density bonus can provide a useful mechanism for increasing allowable density without requiring local officials to approve general plan amendments and zoning changes.”

The density bonus can provide a useful mechanism for increasing allowable density without requiring local officials to approve general plan amendments and zoning changes. A project that satisfies the requirements of the density bonus law often can obtain the necessary land use approvals through the award of the density bonus units and requested concessions and incentives, without having to amend the underlying land use requirements. Friendly local officials may encourage the use of the density bonus to “force” the jurisdiction to approve a desired project.

How the Density Bonus Law Can Help in a Hostile Jurisdiction

It is important to know that the density bonus is a state law requirement which is mandatory on cities and counties, even charter cities which are free from many other state requirements. A developer who meets the law’s requirements for affordable or senior units is entitled to the density bonus and other assistance as of right, regardless of what the locality wants (subject to limited health and safety exceptions). The density bonus statute can be used to achieve reductions in development standards or the granting of concessions or incentives from jurisdictions that otherwise would not be inclined to grant those items. Examples might include a reduction in parking standards if those standards are deemed excessive by the developer, or other reductions in development standards if needed to achieve the total density permitted by the density bonus.

Developers who nonetheless encounter hostility from local jurisdictions are provided several tools to ensure that a required density bonus is actually granted. Developers are entitled to an informal meeting with a local jurisdiction which fails to modify a requested development standard. If a developer successfully sues the locality to enforce the density bonus requirements, it is entitled to an award of its attorneys’ fees. The obligation to pay a developer’s attorneys’ fees is a powerful incentive for local jurisdictions to voluntarily comply with the state

“A developer who meets the law’s requirements for affordable or senior units is entitled to the density bonus and other assistance as of right, regardless of what the locality wants.”

Developers who nonetheless encounter hostility from local jurisdictions are provided several tools to ensure that a required density bonus is actually granted. law density bonus requirements, even when the jurisdiction is not in favor of its effects on the project.

**CEQA Issues in Density Bonus Projects**

Although there is no specific density bonus exemption from the California Environmental Quality Act, many density bonus projects are likely candidates for urban infill and affordable housing exemptions from CEQA. One commonly invoked exemption is the Class 32 urban infill exemption found in CEQA Guidelines Section 15332. That exemption is available if the project is consistent with applicable general plan designation and zoning, the site is five acres or less and surrounded by urban uses, is not habitat for endangered, rare or threatened species, does not have any significant effects relating to traffic, noise, air quality or water quality, and is adequately served by utilities and public services. Other exemptions are available for high density housing projects near major transit stops (CEQA Guidelines Section 15195) and affordable housing projects of up to 100 units (CEQA Guidelines Section 15194).

A recent case, *Wollmer v. City of Berkeley*, clarified the use of the CEQA infill exemption for density bonus projects. In that case, an opponent of a Berkeley density bonus project challenged the City’s use of the urban infill exemption on the grounds that the City’s modifications and waivers of development standards, as required under the density bonus law, meant that the project was not consistent with existing zoning. The court rejected that argument, finding that the modifications required by the density bonus law did not disqualify the project from claiming the exemption.

Not all density bonus projects will qualify for one of these CEQA exemptions, however. Sometimes the additional density provided to non-exempt projects may bring the project out of the coverage of an existing CEQA approval for a general plan, specific plan or other larger project. For instance, if a previously approved environmental impact report analyzed a 100 unit project as the largest allowed under existing zoning, but the developer is able to qualify for 120 units with a density bonus, the existing EIR may not cover the larger project. The larger density bonus project may require additional CEQA analysis for approval.

**Using the Density Bonus to Satisfy Inclusionary Housing Requirements**

Many of California’s cities and counties have adopted inclusionary housing ordinances, which typically require that a specified percentage of units in a new housing development be restricted as affordable units. The inclusionary requirements significantly reduce income from rental units and sales prices of for-sale homes. In today’s tight housing market, compliance with local inclusionary requirements may make many projects economically infeasible. The density bonus provides one method for developers to improve the economics of their project while still complying with the inclusionary
housing requirements. A 2013 case, *Latinos Unidos del Valle de Napa y Solano v. County of Napa*, held that inclusionary units qualify as affordable units for purposes of the density bonus law. The case confirmed that the density bonus is a financial tool available to help developers achieve city and county inclusionary housing requirements.

“**In today’s tight housing market, compliance with local inclusionary requirements may make many projects economically infeasible. The density bonus provides one method for developers to improve the economics of their project while still complying with the inclusionary housing requirements.**”

Local inclusionary housing ordinances are currently in a state of uncertainty due to recent case law. A 2009 case, *Palmer/Sixth Street Properties, L.P. v. City of Los Angeles*, held that inclusionary housing requirements violate the Costa-Hawkins Act, which allows owners of residential rental housing to establish the initial rental rates for housing units without being subject to government rent limits. However, there are exceptions to the Costa-Hawkins rent control prohibition for developers who receive assistance under the density bonus law or who receive direct financial assistance from a public agency. Localities with inclusionary housing ordinances may welcome a developer’s use of the density bonus law because this will effectively prevent the developer from challenging the applicability of the inclusionary housing ordinance.

**Density Bonus and Replacement Housing**

New legislation effective as of January 1, 2015 (Assembly Bill 2222) requires developers obtaining a density bonus to replace existing affordable units demolished or vacated prior to the density bonus application, in addition to providing new affordable units.

**Density Bonus – A Flexible Tool**

The Density Bonus Law can be a powerful tool for a variety of different types of development projects, whether they are traditional affordable housing projects, predominantly market rate housing developments, or senior projects. Obtaining greater density can help the developer of any type of project bring costs and financing sources into line by putting more homes on the land, reducing the per unit land costs. Use of the favorable parking requirements can reduce the amount of costly land needed for parking. The incentives and concessions to be provided by the local government can provide a helpful way to modify development requirements which may stand in the way of a successful project. Of course there is a price to pay for these benefits - the affordable units needed to earn the density bonus. Each developer will need to make a cost-benefit determination whether the cost of compliance is worth the benefits. But the Density Bonus Law is unquestionably a useful option for housing developers trying to make financial sense of their projects in today’s economy.

**Density Bonus Statutes**

Please refer to pages 11 through 17.
Density Bonus Statutes

65915. (a) When an applicant seeks a density bonus for a housing development within, or for the donation of land for housing within, the jurisdiction of a city, county, or city and county, that local government shall provide the applicant with incentives or concessions for the production of housing units and child care facilities as prescribed in this section. All cities, counties, or cities and counties shall adopt an ordinance that specifies how compliance with this section will be implemented. Failure to adopt an ordinance shall not relieve a city, county, or city and county from complying with this section.

(b) (1) A city, county, or city and county shall grant one density bonus, the amount of which shall be as specified in subdivision (f), and incentives or concessions, as described in subdivision (d), when an applicant for a housing development seeks and agrees to construct a housing development, excluding any units permitted by the density bonus awarded pursuant to this section, that will contain at least any one of the following:

(A) Ten percent of the total units of a housing development for lower income households, as defined in Section 50079.5 of the Health and Safety Code.

(B) Five percent of the total units of a housing development for very low income households, as defined in Section 50105 of the Health and Safety Code.

(C) A senior citizen housing development, as defined in Sections 51.3 and 51.12 of the Civil Code, or mobilehome park that limits residency based on age requirements for housing for older persons pursuant to Section 798.76 or 799.5 of the Civil Code.

(D) Ten percent of the total dwelling units in a common interest development as defined in Section 4100 of the Civil Code for persons and families of moderate income, as defined in Section 50093 of the Health and Safety Code, provided that all units in the development are offered to the public for purchase.

(2) For purposes of calculating the amount of the density bonus pursuant to subdivision (f), the applicant who requests a density bonus pursuant to this subdivision shall elect whether the bonus shall be awarded on the basis of subparagraph (A), (B), (C), or (D) of paragraph (1).

(3) For the purposes of this section, "total units" or "total dwelling units" does not include units added by a density bonus awarded pursuant to this section or any local law granting a greater density bonus.

(c) (1) An applicant shall agree to, and the city, county, or city and county shall ensure, continued affordability of all very low and low-income rental units that qualified the applicant for the award of the density bonus for 55 years or a longer period of time if required by the construction or mortgage financing assistance program, mortgage insurance program, or rental subsidy program. Rents for the lower income density bonus units shall be set at an affordable rent as defined in Section 50053 of the Health and Safety Code.

(2) An applicant shall agree to, and the city, county, or city and county shall ensure that, the initial occupant of all for-sale units that qualified the applicant for the award of the density bonus, are persons and families of very low, low, or moderate income, as required, and that the units are offered at an affordable housing cost, as that cost is defined in Section 50052.5 of the Health and Safety Code. The local government shall enforce an equity sharing agreement, unless it is in conflict with the requirements of another public funding source or law. The following apply to the equity sharing agreement:

(A) Upon resale, the seller of the unit shall retain the value of any improvements, the downpayment, and the seller’s proportionate share of appreciation. The local government shall recapture any initial subsidy, as defined in subparagraph (B), and its proportionate share of appreciation, as defined in subparagraph (C), which amount shall be used within five years for any of the purposes described in subdivision (e) of Section 33334.2 of the Health and Safety Code that promote home ownership.

(B) For purposes of this subdivision, the local government’s initial subsidy shall be equal to the fair market value of the home at the time of initial sale minus the initial sale price to the moderate-income household, plus the amount of any downpayment assistance or mortgage assistance. If upon resale the market value is lower than the initial market value, then the value at the time of the resale shall be used as the initial market value.

(C) For purposes of this subdivision, the local government’s proportionate share of appreciation shall be equal to the ratio of the local government’s initial subsidy to the fair market value of the home at the time of initial sale.

(3) (A) An applicant shall be ineligible for a density bonus or any other incentives or concessions under this section if the housing development is proposed on any property that includes a parcel or parcels on which rental dwelling units are or, if the dwelling units have been vacated or demolished in the five-year period preceding the application, have been subject to a recorded covenant, ordinance, or law that restricts rents to levels affordable to persons and families of lower or very low income; subject to any other form of rent or price control through a public entity’s valid exercise of its police power; or occupied by lower or very low income households, unless the proposed housing development replaces those units, and either of the following applies:

(i) The proposed housing development, inclusive of the units replaced pursuant to this paragraph, contains affordable units at the percentages set forth in subdivision (b).

(ii) Each unit in the development, exclusive of a manager’s unit or units, is affordable to, and occupied by, either a lower or very low income household.

(B) For the purposes of this paragraph, “replace” shall mean either of the following:

(i) If any dwelling units described in subparagraph (A) are occupied on the date of application, the proposed
housing development shall provide at least the same number of units of equivalent size or type, or both, to be made available at affordable rent or affordable housing cost to, and occupied by, persons and families in the same or lower income category as those households in occupancy. For unoccupied dwelling units described in subparagraph (A) in a development with occupied units, the proposed housing development shall provide units of equivalent size or type, or both, to be made available at affordable rent or affordable housing cost to, and occupied by, persons and families in the same or lower income category in the same proportion of affordability as the occupied units. All replacement calculations resulting in fractional units shall be rounded up to the next whole number. If the replacement units will be rental dwelling units, these units shall be subject to a recorded affordability restriction for at least 55 years. If the proposed development is for-sale units, the units replaced shall be subject to paragraph (2).

(ii) If all dwelling units described in subparagraph (A) have been vacated or demolished within the five-year period preceding the application, the proposed housing development shall provide at least the same number of units of equivalent size or type, or both, as existed at the highpoint of those units in the five-year period preceding the application to be made available at affordable rent or affordable housing cost to, and occupied by, persons and families in the same or lower income category as those persons and families in occupancy at that time, if known. If the incomes of the persons and families in occupancy at the highpoint is not known, then one-half of the required units shall be made available at affordable rent or affordable housing cost to, and occupied by, very low income persons and families and one-half of the required units shall be made available for rent at affordable housing costs to, and occupied by, low-income persons and families. All replacement calculations resulting in fractional units shall be rounded up to the next whole number. If the replacement units will be rental dwelling units, these units shall be subject to a recorded affordability restriction for at least 55 years. If the proposed development is for-sale units, moderate income in a common interest development.

(B) Two incentives or concessions for projects that include at least 20 percent of the total units for lower income households, at least 10 percent for very low income households, or at least 20 percent for persons and families of moderate income in a common interest development.

(C) Three incentives or concessions for projects that include at least 30 percent of the total units for lower income households, at least 15 percent for very low income households, or at least 30 percent for persons and families of moderate income in a common interest development.

(3) The applicant may initiate judicial proceedings if the city, county, or city and county refuses to grant a requested density bonus, incentive, or concession. If a court finds that the refusal to grant a requested density bonus, incentive, or concession is in violation of this section, the court shall award the plaintiff reasonable attorney’s fees and costs of suit. Nothing in this subdivision shall be interpreted to require a local government to grant an incentive or concession that has a specific, adverse impact, as defined in paragraph (2) of subdivision (d) of Section 65589.5, upon health, safety, or the physical environment, and for which there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact. Nothing in this subdivision shall be interpreted to require a local government to grant an incentive or concession that would have an adverse impact on any real property that is listed in the California Register of Historical Resources. The city, county, or city and county shall establish procedures for carrying out this section, that shall include legislative body approval of the means of compliance with this section.

(e) (1) In no case may a city, county, or city and county apply any development standard that will have the effect of physically precluding the construction of a development meeting the criteria of subdivision (b) at the densities or with the concessions or incentives permitted by this section. An applicant may submit a proposal for the waiver or reduction of
development standards that will have the effect of physically precluding the construction of a development meeting the criteria of subdivision (b) at the densities or with the concessions or incentives permitted under this section, and may request a meeting with the city, county, or city and county. If a court finds that the refusal to grant a waiver or reduction of development standards is in violation of this section, the court shall award the plaintiff reasonable attorney’s fees and costs of suit. Nothing in this subdivision shall be interpreted to require a local government to waive or reduce development standards if the waiver or reduction would have a specific, adverse impact, as defined in paragraph (2) of subdivision (d) of Section 65589.5, upon health, safety, or the physical environment, and for which there is no feasible method to satisfactorily mitigate or avoid the specific adverse impact. Nothing in this subdivision shall be interpreted to require a local government to waive or reduce development standards that would have an adverse impact on any real property that is listed in the California Register of Historical Resources, or to grant any waiver or reduction that would be contrary to state or federal law.

(2) A proposal for the waiver or reduction of development standards pursuant to this subdivision shall neither reduce nor increase the number of incentives or concessions to which the applicant is entitled pursuant to subdivision (d).

(f) For the purposes of this chapter, “density bonus” means a density increase over the otherwise maximum allowable residential density as of the date of application by the applicant to the city, county, or city and county. The applicant may elect to accept a lesser percentage of density bonus. The amount of density bonus to which the applicant is entitled shall vary according to the amount by which the percentage of affordable housing units exceeds the percentage established in subdivision (b).

(1) For housing developments meeting the criteria of subparagraph (A) of paragraph (1) of subdivision (b), the density bonus shall be calculated as follows:

(2) For housing developments meeting the criteria of subparagraph (B) of paragraph (1) of subdivision (b), the density bonus shall be calculated as follows:

(3) For housing developments meeting the criteria of subparagraph (C) of paragraph (1) of subdivision (b), the density bonus shall be 20 percent of the number of senior housing units.

(4) For housing developments meeting the criteria of subparagraph (D) of paragraph (1) of subdivision (b), the density bonus shall be calculated as follows:

(5) All density calculations resulting in fractional units shall be rounded up to the next whole number. The granting of a density bonus shall not be interpreted, in and of itself, to require a general plan amendment, local coastal plan amendment, zoning change, or other discretionary approval.

(g) (1) When an applicant for a tentative subdivision map, parcel map, or other residential development approval donates land to a city, county, or city...
and county in accordance with this subdivision, the applicant shall be entitled to a 15-percent increase above the otherwise maximum allowable residential density for the entire development, as follows:

(2) This increase shall be in addition to any increase in density mandated by subdivision (b), up to a maximum combined mandated density increase of 35 percent if an applicant seeks an increase pursuant to both this subdivision and subdivision (b).

All density calculations resulting in fractional units shall be rounded up to the next whole number. Nothing in this subdivision shall be construed to enlarge or diminish the authority of a city, county, or city and county to require a developer to donate land as a condition of development. An applicant shall be eligible for the increased density bonus described in this subdivision if all of the following conditions are met:

(A) The applicant donates and transfers the land no later than the date of approval of the final subdivision map, parcel map, or residential development application.

(B) The developable acreage and zoning classification of the land being transferred are sufficient to permit construction of units affordable to very low income households in an amount not less than 10 percent of the number of residential units of the proposed development.

(C) The transferred land is at least one acre in size or of sufficient size to permit development of at least 40 units, has the appropriate general plan designation, is appropriately zoned with appropriate development standards for development at the density described in paragraph (3) of subdivision (c) of Section 65583.2, and is or will be served by adequate public facilities and infrastructure.

(D) The transferred land shall have all of the permits and approvals, other than building permits, necessary for the development of the very low income housing units on the transferred land, not later than the date of approval of the final subdivision map, parcel map, or residential development application, except that the local government may subject the proposed development to subsequent design review to the extent authorized by subdivision (i) of Section 65583.2 if the design is not reviewed by the local government prior to the time of transfer.

(E) The transferred land and the affordable units shall be subject to a deed restriction ensuring continued affordability of the units consistent with paragraphs (1) and (2) of subdivision (c), which shall be recorded on the property at the time of the transfer.

(F) The land is transferred to the local agency or to a housing developer approved by the local agency. The local agency may require the applicant to identify and transfer the land to the developer.

(G) The transferred land shall be within the boundary of the proposed development or, if the local agency agrees, within one-quarter mile of the boundary of the proposed development.

(H) A proposed source of funding for the very low income units shall be identified not later than the date of approval of the final subdivision map, parcel map, or residential development application.

(2) This increase shall be in addition to any increase in density mandated by subdivision (b), up to a maximum combined mandated density increase of 35 percent if an applicant seeks an increase pursuant to both this subdivision and subdivision (b).

All density calculations resulting in fractional units shall be rounded up to the next whole number. Nothing in this subdivision shall be construed to enlarge or diminish the authority of a city, county, or city and county to require a developer to donate land as a condition of development. An applicant shall be eligible for the increased density bonus described in this subdivision if all of the following conditions are met:

(A) The applicant donates and transfers the land no later than the date of approval of the final subdivision map, parcel map, or residential development application.

(B) The developable acreage and zoning classification of the land being transferred are sufficient to permit construction of units affordable to very low income households in an amount not less than 10 percent of the number of residential units of the proposed development.

(C) The transferred land is at least one acre in size or of sufficient size to permit development of at least 40 units, has the appropriate general plan designation, is appropriately zoned with appropriate development standards for development at the density described in paragraph (3) of subdivision (c) of Section 65583.2, and is or will be served by adequate public facilities and infrastructure.

(D) The transferred land shall have all of the permits and approvals, other than building permits, necessary for the development of the very low income housing units on the transferred land, not later than the date of approval of the final subdivision map, parcel map, or residential development application, except that the local government may subject the proposed development to subsequent design review to the extent authorized by subdivision (i) of Section 65583.2 if the design is not reviewed by the local government prior to the time of transfer.

(E) The transferred land and the affordable units shall be subject to a deed restriction ensuring continued affordability of the units consistent with paragraphs (1) and (2) of subdivision (c), which shall be recorded on the property at the time of the transfer.

(F) The land is transferred to the local agency or to a housing developer approved by the local agency. The local agency may require the applicant to identify and transfer the land to the developer.

(G) The transferred land shall be within the boundary of the proposed development or, if the local agency agrees, within one-quarter mile of the boundary of the proposed development.

(H) A proposed source of funding for the very low income units shall be identified not later than the date of approval of the final subdivision map, parcel map, or residential development application.

(2) This increase shall be in addition to any increase in density mandated by subdivision (b), up to a maximum combined mandated density increase of 35 percent if an applicant seeks an increase pursuant to both this subdivision and subdivision (b).

All density calculations resulting in fractional units shall be rounded up to the next whole number. Nothing in this subdivision shall be construed to enlarge or diminish the authority of a city, county, or city and county to require a developer to donate land as a condition of development. An applicant shall be eligible for the increased density bonus described in this subdivision if all of the following conditions are met:

(A) The applicant donates and transfers the land no later than the date of approval of the final subdivision map, parcel map, or residential development application.

(B) The developable acreage and zoning classification of the land being transferred are sufficient to permit construction of units affordable to very low income households in an amount not less than 10 percent of the number of residential units of the proposed development.

(C) The transferred land is at least one acre in size or of sufficient size to permit development of at least 40 units, has the appropriate general plan designation, is appropriately zoned with appropriate development standards for development at the density described in paragraph (3) of subdivision (c) of Section 65583.2, and is or will be served by adequate public facilities and infrastructure.

(D) The transferred land shall have all of the permits and approvals, other than building permits, necessary for the development of the very low income housing units on the transferred land, not later than the date of approval of the final subdivision map, parcel map, or residential development application, except that the local government may subject the proposed development to subsequent design review to the extent authorized by subdivision (i) of Section 65583.2 if the design is not reviewed by the local government prior to the time of transfer.

(E) The transferred land and the affordable units shall be subject to a deed restriction ensuring continued affordability of the units consistent with paragraphs (1) and (2) of subdivision (c), which shall be recorded on the property at the time of the transfer.

(F) The land is transferred to the local agency or to a housing developer approved by the local agency. The local agency may require the applicant to identify and transfer the land to the developer.

(G) The transferred land shall be within the boundary of the proposed development or, if the local agency agrees, within one-quarter mile of the boundary of the proposed development.

(H) A proposed source of funding for the very low income units shall be identified not later than the date of approval of the final subdivision map, parcel map, or residential development application.
including, but not limited to, infant centers, preschools, extended day care facilities, and school age child care centers.

(i) “Housing development,” as used in this section, means a development project for five or more residential units. For the purposes of this section, “housing development” also includes a subdivision or common interest development, as defined in Section 1351 of the Civil Code, approved by a city, county, or city and county and consists of residential units or unimproved residential lots and either a project to substantially rehabilitate and convert an existing commercial building to residential use or the substantial rehabilitation of an existing multifamily dwelling, as defined in subdivision (d) of Section 65863.4, where the result of the rehabilitation would be a net increase in available residential units. For the purpose of calculating a density bonus, the residential units shall be on contiguous sites that are the subject of one development application, but do not have to be based upon individual subdivision maps or parcels. The density bonus shall be permitted in geographic areas of the housing development other than the areas where the units for the lower income households are located.

(j) (1) The granting of a concession or incentive shall not be interpreted, in and of itself, to require a general plan amendment, local coastal plan amendment, zoning change, or other discretionary approval. This provision is declaratory of existing law.

(2) Except as provided in subdivisions (d) and (e), the granting of a density bonus shall not be interpreted to require the waiver of a local ordinance or provisions of a local ordinance unrelated to development standards.

(k) For the purposes of this chapter, concession or incentive means any of the following:

(1) A reduction in site development standards or a modification of zoning code requirements or architectural design requirements that exceed the minimum building standards approved by the California Building Standards Commission as provided in Part 2.5 (commencing with Section 18901) of Division 13 of the Health and Safety Code, including, but not limited to, a reduction in setback and square footage requirements and in the ratio of vehicular parking spaces that would otherwise be required that results in identifiable, financially sufficient, and actual cost reductions.

(l) Subdivision (k) does not limit or require the provision of direct financial incentives for the housing development, including the provision of publicly owned land, by the city, county, or city and county, or the waiver of fees or dedication requirements.

(m) This section shall not be construed to supersede or in any way alter or lessen the effect or application of the California Coastal Act of 1976 (Division 20 (commencing with Section 30000) of the Public Resources Code).

(n) If permitted by local ordinance, nothing in this section shall be construed to prohibit a city, county, or city and county from granting a density bonus greater than what is described in this section for a development that meets the requirements of this section or from granting a proportionately lower density bonus than what is required by this section for developments that do not meet the requirements of this section.

(o) For purposes of this section, the following definitions shall apply:

(1) “Development standard” includes a site or construction condition, including, but not limited to, a height limitation, a setback requirement, a floor area ratio, an onsite open-space requirement, or a parking ratio that applies to a residential development pursuant to any ordinance, general plan element, specific plan, charter, or other local condition, law, policy, resolution, or regulation.

(2) “Maximum allowable residential density” means the density allowed under the zoning ordinance and land use element of the general plan, or if a range of density is permitted, means the maximum allowable density for the specific zoning range and land use element of the general plan applicable to the project. Where the density allowed under the zoning ordinance is inconsistent with the density allowed under the land use element of the general plan, the general plan density shall prevail.

(p) (1) Upon the request of the developer, no city, county, or city and county shall require a vehicular parking ratio, inclusive of handicapped and guest parking, of a development meeting the criteria of subdivision (b), that exceeds the following ratios:

(A) Zero to one bedroom: one onsite parking space.

(B) Two to three bedrooms: two onsite parking spaces.

(C) Four and more bedrooms: two and one-half parking spaces.

(2) If the total number of parking spaces required for a development is other than a whole number, the number shall be rounded up to the next whole number. For purposes of this subdivision, a development may provide “onsite parking” through tandem parking or uncovered parking, but not through onstreet parking.

(3) This subdivision shall apply to a development that meets the requirements of subdivision (b) but only at the request of the applicant. An applicant may request parking incentives or concessions beyond those provided in this subdivision pursuant to subdivision (d).

65915.5. (a) When an applicant for approval to convert apartments to a condominium project agrees to provide at least 33 percent of the total units...
of the proposed condominium project to persons and families of low or moderate income as defined in Section 50093 of the Health and Safety Code, or 15 percent of the total units of the proposed condominium project to lower income households as defined in Section 50079.5 of the Health and Safety Code, and agrees to pay for the reasonably necessary administrative costs incurred by a city, county, or city and county pursuant to this section, the city, county, or city and county shall either (1) grant a density bonus or (2) provide other incentives of equivalent financial value. A city, county, or city and county may place such reasonable conditions on the granting of a density bonus or other incentives of equivalent financial value as it finds appropriate, including, but not limited to, conditions which assure continued affordability of units to subsequent purchasers who are persons and families of low and moderate income or lower income households.

(b) For purposes of this section, “density bonus” means an increase in units of 25 percent over the number of apartments, to be provided within the existing structure or structures proposed for conversion.

(c) For purposes of this section, “other incentives of equivalent financial value” shall not be construed to require a city, county, or city and county to provide cash transfer payments or other monetary compensation but may include the reduction or waiver of requirements which the city, county, or city and county might otherwise apply as conditions of conversion approval.

(d) An applicant for approval to convert apartments to a condominium project may submit to a city, county, or city and county a preliminary proposal pursuant to this section prior to the submittal of any formal requests for subdivision map approvals. The city, county, or city and county shall, within 90 days of receipt of a written proposal, notify the applicant in writing of the manner in which it will comply with this section. The city, county, or city and county shall establish procedures for carrying out this section, which shall include legislative body approval of the means of compliance with this section.

(e) Nothing in this section shall be construed to require a city, county, or city and county to approve a proposal to convert apartments to condominiums.

(f) An applicant shall be ineligible for a density bonus or other incentives under this section if the apartments proposed for conversion constitute a housing development for which a density bonus or other incentives were provided under Section 65915.

(g) An applicant shall be ineligible for a density bonus or any other incentives or concessions under this section if the condominium project is proposed on any property that includes a parcel or parcels on which rental dwelling units are or, if the dwelling units have been vacated or demolished in the five-year period preceding the application, have been subject to a recorded covenant, ordinance, or law that restricts rents to levels affordable to persons and families of lower or very low income; subject to any other form of rent or price control through a public entity’s valid exercise of its police power; or occupied by lower or very low income households, unless the proposed condominium project replaces those units, as defined in subparagraph (B) of paragraph (3) of subdivision (c) of Section 65915, and either of the following applies:

(1) The proposed condominium project, inclusive of the units replaced pursuant to subparagraph (B) of paragraph (3) of subdivision (c) of Section 65915, contains affordable units at the percentages set forth in subdivision (a).

(2) Each unit in the development, exclusive of a manager’s unit or units, is affordable to, and occupied by, either a lower or very low income household.

(h) Subdivision (g) does not apply to an applicant seeking a density bonus for a proposed housing development if their application was submitted to, or processed by, a city, county, or city and county before January 1, 2015.

65916. Where there is a direct financial contribution to a housing development pursuant to Section 65915 through participation in cost of infrastructure, write-down of land costs, or subsidizing the cost of construction, the city, county, or city and county shall assure continued availability for low- and moderate-income units for 30 years. When appropriate, the agreement provided for in Section 65915 shall specify the mechanisms and procedures necessary to carry out this section.

65917. In enacting this chapter it is the intent of the Legislature that the density bonus or other incentives offered by the city, county, or city and county pursuant to this chapter shall contribute significantly to the economic feasibility of lower income housing in proposed housing developments. In the absence of an agreement by a developer in accordance with Section 65915, a locality shall not offer a density bonus or any other incentive that would undermine the intent of this chapter.

65917.5 (a) As used in this section, the following terms shall have the following meanings:

(1) “Child care facility” means a facility installed, operated, and maintained under this section for the nonresidential care of children as defined under applicable state licensing requirements for the facility.

(2) “Density bonus” means a floor area ratio bonus over the otherwise maximum allowable density permitted under the applicable zoning ordinance and land use elements of the general plan of a city, including a charter city, city and county, or county of:

(A) A maximum of five square feet of floor area for each one square foot of floor area contained in the child care facility for existing structures.

(B) A maximum of 10 square feet of floor area for each one square foot of floor area contained in the child care facility for new structures. For purposes of calculating the density bonus under this section, both indoor and outdoor square footage requirements for the child care facility as set forth in applicable state child care licensing requirements shall be included in the floor area of the child care facility.

(3) “Developer” means the owner or other person, including a lessee, having the right under the applicable zoning
ordinance of a city council, including a charter city council, city and county board of supervisors, or county board of supervisors to make an application for development approvals for the development or redevelopment of a commercial or industrial project.

(4) “Floor area” means as to a commercial or industrial project, the floor area as calculated under the applicable zoning ordinance of a city council, including a charter city council, city and county board of supervisors, or county board of supervisors and as to a child care facility, the total area contained within the exterior walls of the facility and all outdoor areas devoted to the use of the facility in accordance with applicable state child care licensing requirements.

(b) A city council, including a charter city council, city and county board of supervisors, or county board of supervisors may establish a procedure by ordinance to grant a developer of a commercial or industrial project, containing at least 50,000 square feet of floor area, a density bonus when that developer has set aside at least 2,000 square feet of floor area and 3,000 outdoor square feet to be used for a child care facility. The granting of a bonus shall not preclude a city council, including a charter city council, city and county board of supervisors, or county board of supervisors from imposing necessary conditions on the project or on the additional square footage. Projects constructed under this section shall conform to height, setback, lot coverage, architectural review, site plan review, fees, charges, and other health, safety, and zoning requirements generally applicable to construction in the zone in which the property is located. A consortium with more than one developer may be permitted to achieve the threshold amount for the available density bonus with each developer’s density bonus equal to the percentage participation of the developer. This facility may be located on the project site or may be located offsite as agreed upon by the developer and local agency. If the child care facility is not located on the site of the project, the local agency shall determine whether the location of the child care facility is appropriate and whether it conforms with the intent of this section. The child care facility shall be of a size to comply with all state licensing requirements in order to accommodate at least 40 children.

(c) The developer may operate the child care facility itself or may contract with a licensed child care provider to operate the facility. In all cases, the developer shall show ongoing coordination with a local child care resource and referral network or local governmental child care coordinator in order to qualify for the density bonus.

(d) If the developer uses space allocated for child care facility purposes, in accordance with subdivision (b), for purposes other than for a child care facility, an assessment based on the square footage of the project may be levied and collected by the city council, including a charter city council, city and county board of supervisors, or county board of supervisors. The assessment shall be consistent with the market value of the space. If the developer fails to have the space allocated for the child care facility within three years, from the date upon which the first temporary certificate of occupancy is granted, an assessment based on the square footage of the project may be levied and collected by the city council, including a charter city council, city and county board of supervisors, or county board of supervisors in accordance with procedures to be developed by the legislative body of the city council, including a charter city council, city and county board of supervisors, or county board of supervisors. The assessment shall be consistent with the market value of the space. A penalty levied against a consortium of developers shall be charged to each developer in an amount equal to the developer’s percentage square feet participation. Funds collected pursuant to this subdivision shall be deposited by the city council, including a charter city council, city and county board of supervisors, or county board of supervisors into a special account to be used for child care services or child care facilities.

(e) Once the child care facility has been established, prior to the closure, change in use, or reduction in the physical size of, the facility, the city, city council, including a charter city council, city and county board of supervisors, or county board of supervisors shall be required to make a finding that the need for child care is no longer present, or is not present to the same degree as it was at the time the facility was established.

(f) The requirements of Chapter 5 (commencing with Section 66000) and of the amendments made to Sections 53077, 54997, and 54998 by Chapter 1002 of the Statutes of 1987 shall not apply to actions taken in accordance with this section.

(g) This section shall not apply to a voter-approved ordinance adopted by referendum or initiative.

65918. The provisions of this chapter shall apply to charter cities.
